

EMERGENCY WATER SHUT OFF

For Immediate Release
September 6, 2018

Flood Mitigation Works

Unfortunately due to infrastructure problems with valves additional water customers were shut off after 10:00 a.m. this morning (September 6). The extra customers that were not notified about the shut off are on Highway 97 (Road 5 to Road 4), Road 4 and Snowbrush Street.

Flood mitigation works were scheduled to facilitate the lowering of water mains to install a larger box culvert at Road 5 and Highway 97. Water was scheduled to be off September 6, 2018 between 8:30 - 4:30 for domestic water users, affected addresses were notified with a door hangar that provided additional information.

The Town apologizes for inconveniences to its customers, and hope the water will be back on by 4:30 pm. After water service is restored, air or discoloured water may be present in the piping. Running a garden hose or cold water bathtub faucet for several minutes, should eliminate both air and discoloured water problems. If you have a specialized water filtration unit within your premise, it may need to be isolated to prevent any blockage which could result form this water outage.
