

# STATION STREET RECONSTRUCTION PROJECT

For Immediate Release  
March 29, 2018

## **Fairview Road to Bank Avenue**

Construction works continue to upgrade water, sewer, storm water and road on Fairview Road. The majority of the work will continue on to Station Street to Bank Avenue. The project started on February 15, 2018 and will continue to June 2018.

Progress has been slower than anticipated due to the high water table. The Town hopes to provide an approximate date when construction works move from Fairview to Station Street in the near future.

Residents will experience traffic disruptions and temporary road closures throughout the project duration. We ask that people be patient, be aware of traffic control, and help support the local businesses during this project.

The construction drawing is available at [www.oliver.ca](http://www.oliver.ca) > What's Happening > Station Street Reconstruction
