

## Apply for an opportunity to get a FREE business waste audit! (value over \$500)

GreenStep Solutions is working with the RDOS on a Business Education Program regarding waste, recycling, and composting in the region. The program includes a public consultation process early this summer, and a limited number of waste audits this April for businesses and multi-family properties throughout the RDOS.

Do YOU want a free waste audit for your business or multi-family property? You can learn about the composition of your waste streams, get a baseline data set, and start making improvements to your waste systems. This will help you to improve recycling practices before potential bylaw changes come into place.

To apply for a waste audit, contact [andrea@greenstep.ca](mailto:andrea@greenstep.ca) with the following information:

- Your business name and physical address
- Industry/business type
- Number of employees OR number of units in your multi-family residence
- Type of waste hauling infrastructure (ie. roll-off bin, dumpster, rolling cart, etc)
- Why you would like a waste audit

### Deadline to apply is April 22, 2017

There are a limited number of waste audits available and will be selecting applicants based on business type and geographic area. Apply ASAP for a better chance at getting a spot.

We look forward to working with you!
