

2021 IRRIGATION TURN-OFF

The irrigation season for agricultural customers using pressurized water from the Oliver Water System (rural and urban) ends on:

Tuesday, October 12th, 2021

Crews will begin turning off services at 8:00 a.m. on Tuesday, October 12th. If your service has not been turned off by Friday, October 28th, please contact the Public Works Department at 250-485-6213. In any case, no agricultural irrigation is permitted from the pressurized water system after October 12th, unless late water has been purchased in advance.

Growers on the pressurized system, who require irrigation beyond October 12th, need to apply to the Public Works Department no later than Tuesday, October 12th, in order to avoid additional turn-on fees. The cost for late water is \$1.70 per acre, per day, and is available until Monday, October 25, 2021.

To facilitate grape growers who pump their own water from the irrigation canal, the Town will again maintain flows to a later date. Canal diversion will cease on Tuesday, October 26, 2021.
